- When fanned and jogged, subject to user test, running laminated stock will blunt the blades more quickly. Paper must not be curled. Not designed to run leather effect paper, paper must not have hooked edges.

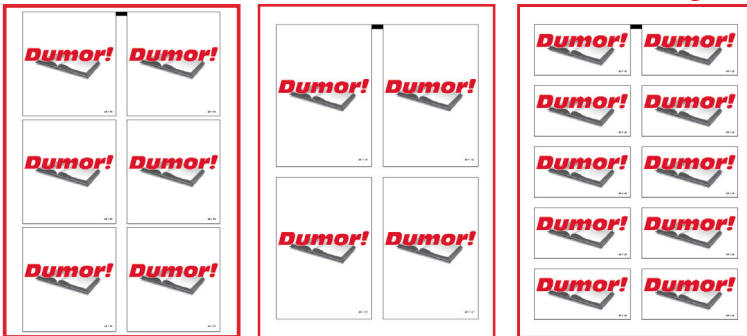

Specifications subject to change without notice, non contractual document, omissions and errors excepted, copyright Dumor 2008

## Features

- Computer chip controlled, change format at the touch of a button, no tools needed ever
- Five standard card sizes pre programmed
- Adjustable first cut length and for follow on cuts to take into account image drift, unique on this class of machine
- Standard fitment mark reader for automatic self adjustment on-the-fly for compensation of variable image drift (a feature only found on machines costing 15 times more)
- Adjustable gutter cut length and card length by up to +2 mm for custom length cards. Adjustable first and follow on cuts by up to +-2 mm. Width and side slitting width, done via the keyboard
- Handles card stock from 180 gsm to 300 gsm no adjustment needed
- Feeds most kinds of stock, special feed rollers and separator ensure no double feeds or marking even with matt coated papers\*
- Adjustable infeed size from 195 up to 216 x 297 mm
- Feed tray holds 1 cm of paper, self compensating for paper density and thickness
- Processes up to 4,5 sheets per minute
- Adjustable card reception tray for shorter and longer cards
- Cutting precision better than 0.1 mm
- Long lasting slitter wheels and cross cutter blade stay sharp for more than 100000 cycles
- Replacement of blades is quick and easy
- Light weight, easily transported to point of use
- Small space requirement. Fits virtually anywhere, very quiet operation, cutting area fully guarded with interlock
