Dumor Table Top Binder
Digibind 36

The world's most advanced table top **hot-melt binder**

Make no mistake: This binder takes off where all other table top binders end! Just look at these features: Fully automatic binding process to 36mm, optional auto start function, cylindrical milling, adjustable cover clamp side pressure and holding time, adjustable cover clamp dorsal pressure for ultra square cover wrap, padding with programmable paper holding time, adjustable glue tank height, spreader and scraper rollers, vacuum chip extraction, guarded front and rear, twice as heavy frame as the next competitor which results in a far more stable design, ultra space saving design, can bind hard covers to book blocks.

Innovation! Quality! Value!

Technical specifications

Model	Dumor Digibind 36
Max binding thickness	36 mm
Max binding length	330 mm
Min book size	spine 60 height 90
Max cover size	330 x 690 approx
Max cover weight	350 gsm*
Production speed	250 / hr*
Power consumption	1200 watt
Weight	90 kg
Size	640x 640 x 350 mm
Voltage	220V +/- 10pct, 60Hz

*Certain covers may require pre creasing for optimal wraparound, depends on operator, paper and book size

Specifications subject to change without notice, errors and omissions excepted, copyright Dumor 2008c

Features

- Binding up to 36 mm x 330 mm
- Milling preparation of the spine by cylindrical milling tool with waste recovery
- Fully guarded
- Very small footprint 640 x 640 mm
- Very low heat and smoke emissions
- Fully automatic process, just load the paper and cover, the binding takes place automatically
- Programmable adjustable cover clamp force, dwell time, spine pressure, book holding time
- Cycle counter
- Self diagnostic program
- Padding is possible
- Patented micrometer dorsal pressure adjustment for a ultra square back
- Adjustable glue tank height
- Hard cover binding is possible
- Adjustable cover side and dorsal pressure and pressing time
